(PDF) International Textbook on Diabetes Mellitus: volumes ...

Seven years on from the last edition of the International Textbook of Diabetes Mellitus the incidences of obesity, type 2 diabetes and even type 1 diabetes have all increased dramatically. In the year 2000, according to the World Health Organization, 150 million people worldwide were living with diabetes; by 2025 the prevalence is projected to double—probably a conservative estimate since childhood obesity and type 2 diabetes show alarming increases.
